

SSDF Collaborates with Leading Construction Companies to Enhance Training Standards

In a landmark move aimed at advancing skill development and safety training within the construction sector, Safety Skill Development Foundation (SSDF) has partnered with prominent industry players including the National Buildings Construction Corporation (NBCC), Simplex Infrastructures Limited, Techno culture Building Centre Pvt Ltd (Vastu Vihar), and Indiavision Realty & Infrastructure Pvt Ltd. This strategic collaboration underscores a collective commitment to elevate training and certification standards for construction workers and professionals, thereby reinforcing safety, efficiency, and quality practices on construction sites.

Recognizing the pivotal role of skilled labor in ensuring project success and mitigating risks, SSDF and its esteemed partners are pooling resources and expertise to enhance skill training initiatives. By aligning training programs with industry best practices and regulatory requirements, the collaborative effort seeks to empower construction workers with the necessary competencies to execute tasks safely and proficiently. The partnership between SSDF and leading construction companies signifies a shared vision for driving positive change and progress within the sector. Through concerted efforts to improve skill and safety training standards, the collective endeavor aims to foster a culture of excellence, innovation, and professionalism across construction sites nationwide.

This strategic alliance marks a significant milestone in the journey towards enhancing skill development and safety practices within the construction industry. As SSDF and its

partner companies embark on this collaborative venture, they remain steadfast in their commitment to shaping a skilled workforce capable of meeting the evolving demands of the construction sector and contributing to the nation's infrastructure development endeavours.
