Training Parameters

Sectors	Hydrocarbon, Iron & steel, Mining, Power, Automotive, Construction, Chemical / Petrochemical, and others.
Sub-Sector	-
Occupation	Occupational Safety Health & Environment (OSHE) Engineering & Management
Country	India
NSQF Level	4.5
Aligned to NCO/ISCO/ISIC Code	NCO-2015/2141.2600 Occupational Health and Safety Specialist.
Minimum Educational Qualification and Experience	Completed 12th with science or equivalent with 4-year of relevant experience or Completed 3-year diploma (after 10 th) in relevant field with 3-year of relevant experience or Completed 2-year NTC (after 10 th) in relevant field with 4-year of relevant experience or Previous qualification of NSQC level 4 with 1.5 years of relevant experience
Pre-Requisite License or Training	Nil
Minimum Job Entry Age	18 years
Last Reviewed On	31-01-2024
Next Review Date	31-01-2027
Version	1.0
NSQC Approval Date	31-01-2024
Model Curriculum Creation Date	31-01-2024
Model Curriculum Valid Up to Date	31-01-2027
Model Curriculum Version	1.0
Minimum Duration of the Course	600 Hours
Maximum Duration of the Course	600 Hours

Program Overview

This section summarizes the end objectives of the program along with its duration.

Training Outcomes

After completing the program, the participant will be able to: -

- Perform and fulfill Health & Safety at the workplace.
- Prepare Health & Safety record documents like permit to work, HIRA, HAZOP etc...
- Understand the safety audit process in an organization.
- Define scope of the safety management system.
- Perform risk assessment of a workplace.
- Know & understand the good practices in organization and develop a positive safety culture.
- Understand proper communication channels in an organization.
- Collect and analyze the root cause of incidents.
- Drive motivation towards Health & Safety.
- Plan, organize and implement safety committee recommendations at the workplace.
- Advise management on new technological advancement in health & Safety.
- Meet regulatory requirements in Health & Safety as per various acts and regulations.
- Role of management in an organization, role of safety Inspector, safety officer, safety engineer, and safety manager.
- Fundamentals of process safety, OSHA standards QRA, LOPA, SIL, FERA, EERA.
- Role of occupier, controller of premise, role & need of contractors in the organization & work permit to contractors, role of safety committee.
- Selection prerequisites of a contractor, management of contractors, review meetings, safety committee meetings, method statements, accident reporting, training programs, statutory inspections, permit to work, gaps in contractor safety implementation of contractor safety.

Compulsory Modules

The table lists the modules and their duration corresponding to the Compulsory NOS of the QP.

NOS and Module Details	Theory Duration	Practical Duration	On-the-Job Training Duration (Mandatory)	On-the-Job Training Duration (Recommended)	Total Duration
SSD/N0106 : Introduction to Occupational Safety, Health, and Environment (OSHE).	45:00 Hours	15:00 Hours	30:00 Hours	00:00 Hours	90:00 Hours
Module 1: Introduction to Training Program, Overview, assessments, role of Safety Supervisor, employment opportunities in Industries.	04:00 Hours	00:00 Hours	00:00 Hours	00:00 Hours	04:00 Hours

Module 2: Understand, plan, develop, implement, and monitor health and safety practices at the workplace. The NOS will help in identifying the loopholes and gaps in the system and rectify them without directly affecting the core business of an organization.	41:00 Hours	15:00 Hours	30:00 Hours	00:00 Hours	86:00 Hours
SSD/N0107 : Fire Safety, firefighting equipment, and fire evacuation plan.	45:00 Hours	25:00 Hours	20:00 Hours	00:00 Hours	90:00 Hours
Module 3: Identify fire hazard at workplace, understand different classes of fire hazard, suggest firefighting methods to the management for office, industries, evacuations, and fire drills.	45:00 Hours	25:00 Hours	20:00 Hours	00:00 Hours	90:00 Hours
SSD/N0108 : Hazard Identification, Categories and Control.	60:00 Hours	40:00 Hours	20:00 Hours	00:00 Hours	120:00 Hours
Module 4: Knowledge & skills to identify hazards at workplace, severity of hazards, risk rating, protection overview and improved methodologies.	60:00 Hours	40:00 Hours	20:00 Hours	00:00 Hours	120:00 Hours
SSD/N0109: Statutes & Legislative requirements in Health & Safety.	60:00 Hours	60:00 Hours	00:00 Hours	00:00 Hours	120:00 Hours
Module 5: Learn regulations & regulatory compliance requirements as per the laws governed by the Government of India. Identify the shortcomings as per the recommendation of the regulatory body for a particular task or activity.	60:00 Hours	60:00 Hours	00:00 Hours	00:00 Hours	120:00 Hours

Module 6: Knowledge & understanding to take precautions & measures to ensure proper health, hygiene, working environment and	30:00 Hours	20:00 Hours	10:00 Hours	00:00 Hours	60:00 Hours

psychological health of workers at workplace.					
SSD/N0104 : Plan, Organize and Emergency protocols	30:00 Hours	20:00 Hours	10:00 Hours	00:00 Hours	60:00 Hours
Module 7: Planning and organizing to provide a safe working environment for workers and set emergency protocols and measure in case of any unforeseen incidents or accidents to minimize the damages & losses.	30:00 Hours	20:00 Hours	10:00 Hours	00:00 Hours	60:00 Hours
DGT/VSQ/N0102: Employability Skills	30:00 Hours	30:00 Hours	00:00 Hours	00:00 Hours	60:00 Hours
Module 8: Understand scope in employment, financial dealing, digital literacy and communication with employer or customer.	30:00 Hours	30:00 Hours	00:00 Hours	00:00 Hours	60:00 Hours
Total Duration	300:00 Hours	210:00 Hours	90:00 Hours	00:00 Hours	600:00 Hours

Module Details

Module 1: Introduction to Training Program, Overview, assessments, role of Safety Supervisor, employment opportunities in Industries.

Mapped to SSD/N0106, v 1.0

Terminal Outcomes:

- Discuss the Safety Supervisor role, sectors & industries.
- Employment opportunities, career development & International opportunities.
- Course approach, duration, training & assessment processes.

Duration: 04:00	Duration: 00:00
Theory–Key Learning Outcomes	Practical–Key Learning Outcomes

<ul style="list-style-type: none"> • Role & responsibilities of Safety Supervisor. • Iceberg theory of safety. • Career progression in the occupation. • Industries for Employment & international opportunities for employment. • Training approach & methodology. • Assessment process & Certification. • The assistance provided by AB/TP/LMIS in employment. 	
Classroom Aids:	
Black/White Board, Computer, Projection Equipment, PowerPoint Presentation and software, Facilitator's Guide, Participant's Handbook.	
Tools, Equipment and Other Requirements	
Nil	

Module 2: Understand, plan, develop, implement, and monitor health and safety practices at the workplace. The NOS will help in identifying the loopholes and gaps in the system and rectify them without directly affecting the core business of an organization.

Mapped to SSD/N0106, v 1.0

Terminal Outcomes:

- Understand health & safety requirements & safety audit.
- Understand the direct & indirect financial losses of an organization because of an accident.
- Prepare Safety Policy.
- Set organizational Health & Safety goals and objectives.
- Manage risk by developing a positive safety culture.
- Channelize proper mode of accident and incident reporting.
- Onboard and manage contractors to comply with statutory requirements in occupational H&S.
- Understand & conduct training.

Duration: 41 Hours	Duration: 15 Hours
Theory–Key Learning Outcomes	Practical–Key Learning Outcomes
<ul style="list-style-type: none"> • Overview of Health, Safety and Environment management at workplace, its importance and the moral, financial and legal reason for health and safety at workplace. Understanding the moral duty of care. Statutory duties and enforcement agencies. • “Accident Cost- Iceberg” theory of direct and indirect cost incurred from an incident. • The employer responsibilities in providing safe working conditions and the employee rights & responsibilities at a workplace, safety culture & its indicators and role of International Labor Organization in health & safety. • Introduction to Safety Policy, understanding the underlying general statement of intent in a safety policy, its aim, objects, and the “SMART” concept of goal setting. • Introduction to safety audit, audit objective, types of audits in H&S management system. Requirement of safety audit at workplace, task audit, program, activity, and project & machinery. Learning the scope of internal and external audit, reasons & advantages of such audits, key responsibility of an auditor. • Introduction to parties in an audit: - First-party, second-party and third-party audits, finding the scope of such audits. Deep dive into the compliance audit, program audit & management system audit in health and safety management system. • Defining the role of management in an organization, key factors that influence development of a positive culture in an organization. Key responsibilities of safety supervisor, safety officer, safety engineer, and safety manager. • Defining role of occupier, controller of premise, role & need of contractors in the organization as per ILO. 	<ul style="list-style-type: none"> • Work out safety requirements. • Prepare Safety Policy. • Prepare Safety goals and objectives. • Developing a positive safety culture for risk management. • Prepare incident reporting. • Conduct safety training. • Role of management in an organization, role of safety Inspector, safety officer, safety engineer, and safety manager. • Fundamentals of process safety, OSHA standards QRA, LOPA, SIL, FERA, EERA. • Role of occupier, controller of premise, role & need of contractors in the organization & work permit to contractors, role of safety committee. • Selection prerequisites of a contractor, management of contractors , review meetings, safety committee meetings, method statements, accident reporting, training programs, statutory inspections, permit to work, gaps in contractor safety implementation of contractor safety.

<ul style="list-style-type: none"> • Understanding the requirement of work permit to contractors and the role of the safety committee in ensuring control over contractors. • Deep dive into the selection prerequisites of a contractor, management of contractors, review meetings, safety committee meetings, method statements, accident reporting, training programs, statutory inspections, permit to work; to ensure safe systems of work. • Overview of the requirement of Plan-Do-Check-Act (PDCA) Cycle in safety management system; Implementation of PDCA cycle in H&S management system and know how it plays an important key element in continuous improvement in safety culture. • Introduction to training and its types; the need of training, knowing the contents of induction training. Selection of a competent person at workplace • Role of management in an organization, role of safety Inspector, safety officer, safety engineer, and safety manager. • Fundamentals of process safety, OSHA standards QRA, LOPA, SIL, FERA, EERA. • Role of occupier, controller of premise, role & need of contractors in the organization & work permit to contractors, role of safety committee. • Selection prerequisites of a contractor, management of contractors, review meetings, safety committee meetings, method statements, accident reporting, training programs, statutory inspections, permit to work, gaps in contractor safety implementation of contractor safety. 	
Classroom Aids:	
Black/White Board, Computer, Projection Equipment, PowerPoint Presentation and software, Facilitator's Guide, Participant's Handbook.	
Tools, Equipment and Other Requirements	

Safety goggles, Full face shield, Leather gloves, Puncture resistant gloves, Chemical resistant gloves, Electrically insulated latex gloves, Safety helmets/hard hats, Ear plugs, Ear muffs, Safety shoes, Safety gumboots, High visibility jackets, N95 masks, Double filter half face mask, Double filter full face mask, SCBA – Self-contained breathing apparatus, Safety harness, Lanyard, Fall arrestor, CO2 Fire extinguisher, Dry Chemical Powder Fire extinguisher, Fire hydrant system, Multiple gas detector, TDS Meter

Module 3: Identify fire hazard at workplace, understand different classes of fire hazard, suggest firefighting methods to the management for office, industries, evacuations, and fire drills

Mapped to SSD/N0107, v 1.0

Terminal Outcomes:

- Identify fire hazards at the workplace.
- Distinguish between different classes of fire.
- Evacuations, fire drills, use of PPEs.
- Develop systematic approach in identifying and correcting probable fire accidents and suggest fire-fighting equipment.
- Operate fire extinguisher and fire hydrant.

Duration: 45 Hours	Duration: 25 Hours
Theory–Key Learning Outcomes	Practical–Key Learning Outcomes
<ul style="list-style-type: none"> • Introduction to basic terminologies & concepts in fire safety: - Flammable liquids, Combustible matter/liquids, Combustible gases, combustion, oxygen percentage in air, exothermic and endothermic reactions, flash point and fire point. Learn the concept of transmission of heat by conduction, convection, and radiation. • Introduction to Fire triangle and classification fire. Learn the common reason for fire accidents. The four stages fire- incipient, growth, fully developed and decay. Fire retardation by controlling of fuel source, control of ignition source and control of oxygen. • Knowledge of types of extinguishing media- water, foam, dry chemical powder & carbon dioxide. • Types of fire-fighting equipment and its components. Learning the assembly of hydrant systems, principle of operation. 	<ul style="list-style-type: none"> • Identify fire hazards at the workplace. • Distinguish between different classes of fire. • Evacuations, fire drills, use of PPEs. • Develop systematic approach in identifying and correcting probable fire accidents and suggest fire-fighting equipment. • Operate fire extinguisher and fire hydrant.

- Introduction to suppression fire with extinguisher using PASS technique. Preparation fire extinguisher checklist of components of extinguisher for regular maintenance at workplace.
- Introduction to use of smoke detectors, fire alarm, emergency lighting, flashing light, sprinklers, and pressure requirements in fire hydrants. Understanding of them plays a crucial role in fire prevention.
- New technological interventions in fire safety like water mist system, online hydrant pressure monitoring, wireless fire detection system etc.
- Use of PPEs in fire safety – Helmet, turnout gear, gloves, boots, SCBA (Self-contained breathing apparatus) and use of SCBA.
- Requirements of emergency evacuation – Escape route as per IS1644.
- Understand Fire door, emergency directional signages, assembly point, evacuation, evacuation of differently abled, evacuation procedure, role of “Fire Marshals.”
- Introduction to fire drills and emergency evacuation. Learn how to do fire drills and emergency evacuations during an emergency. Learn what is an emergency and types of emergencies at a workplace.

Classroom Aids:

Black/White Board, Computer, Projection Equipment, MS office & Design & drafting software, Facilitator’s Guide, Participant’s Handbook.

Tools, Equipment and Other Requirements

Safety goggles, Full face shield, Leather gloves, Puncture resistant gloves, Chemical resistant gloves, Electrically insulated latex gloves, Safety helmets/hard hats, Ear plugs, Ear muffs, Safety shoes, Safety gumboots, High visibility jackets, N95 masks, Double filter half face mask, Double filter full face mask, SCBA – Self-contained breathing apparatus, Safety harness, Lanyard, Fall arrestor, CO2 Fire extinguisher, Dry Chemical Powder Fire extinguisher, Fire hydrant system, Multiple gas detector, TDS Meter.

Module 4: Knowledge & skills to identify hazards at workplace, severity of hazards, risk rating, protection overview and improved methodologies.

Mapped to SSD/N0108, v 1.0

Terminal Outcomes:

- Identify hazards & categories the hazards
- Implement “Hierarchy of control” in improvement methodologies.
- Understand hidden risk in improved methodologies.

Duration: 60 Hours	Duration: 40 Hours
Theory–Key Learning Outcomes	Practical–Key Learning Outcomes
<ul style="list-style-type: none"> • Introduction to hazards and basic terminologies used in hazard identification. • Overview of hazard categories and risks involved in each hazard. • Introduction to the hierarchy of control in safety. Importance of each hierarchy of control. Deep dive into the steps in the hierarchy of control. • Deep dive into different hazard categories & control. ex: Electricity, Fire, Tools, equipment and machinery, Health and workplace hazard, Hazardous substances, musculoskeletal disorders, manual handling, and load handling equipment, noise, vibration, radiation, mental ill- health, violence at work, substance abuse at workplace, lifting and rigging hazards and control. 	<ul style="list-style-type: none"> • Identify hazards & categories the hazards • Implement “Hierarchy of control” in improvement methodologies. • Identify hidden risk in improved methodologies.
Classroom Aids:	
Black/White Board, Computer, Projection Equipment, MS office & Design & drafting software, Facilitator’s Guide, Participant’s Handbook.	
Tools, Equipment and Other Requirements	
Safety goggles, Full face shield, Leather gloves , Puncture resistant gloves, Chemical resistant gloves, Electrically insulated latex gloves, Safety helmets/hard hats, Ear plugs, Ear muffs, Safety shoes, Safety gumboots, High visibility jackets, N95 masks, Double filter half face mask, Double filter full face mask, SCBA – Self-contained breathing apparatus, Safety harness, Lanyard, Fall arrestor, CO2 Fire extinguisher, Dry Chemical Powder Fire extinguisher, Fire hydrant system, Multiple gas detector, TDS Meter.	

Module 5: Learn regulations & regulatory compliance requirements as per the laws governed by the Government of India. Identify the shortcomings as per the recommendation of the regulatory body for a particular task or activity.

Mapped to SSD/N0109, v 1.0

Terminal Outcomes:

Comply with regulatory requirements of various acts including OSH Code 2020, BOCW Act 1996 & Factories Act 1948, and the regulations and enforcement decided by the environmental act, 1986, Occupational Safety & Health Administration (OSHA) compliance requirements, ILO Guidelines related to EHS, Oil Industry Safety Directorate (OSID) Guidelines, Mines Vocational Training Rules – DGMS, Electricity Act 2010 & 2003, National Fire Protection Association regulations, NBC 2016, Petroleum & Explosive Safety Organization (PESO)-Explosive Act 1884, Workmen Compensation Act 1923 & Employee State Insurance Act 1948 and related compliance, and the CPCB.

Duration: 60 Hours	Duration: 60 Hours
Theory–Key Learning Outcomes	Practical–Key Learning Outcomes
<ul style="list-style-type: none"> • Apply regulatory obligations pertaining to safety, health, and environmental compliance in accordance with the BOCW Act of 1996. • Apply regulatory obligations pertaining to safety, health & environment compliance as per Factories Act, 1948. • Apply regulatory obligations pertaining to safety, health & environment compliance as per OSH Code 2020 & Occupational Safety & Health Administration (OSHA) compliance requirements. • Apply regulatory obligations pertaining to Environment Protection Act, 1986 & ILO Guidelines related to EHS. • Apply regulatory obligations pertaining to Oil Industry Safety Directorate (OSID) Guidelines. • Apply regulatory obligations pertaining to Mines Vocational Training Rules – DGMS. • Apply regulatory obligations pertaining to Electricity Act 2010 & 2003. • Apply regulatory obligations pertaining to National Building Code (NBC) – 2016. • Apply regulatory obligations pertaining to National Fire Protection Association regulations. 	<ul style="list-style-type: none"> • Ensure BOCW act safeguards the rights and interests of workers in the construction sector in terms of accidental insurance, pension coverage, maternity benefits, child education assistance and Immediate healthcare and financial assistance. • Ensure factories act protect the health and safety of workers, ensures that adherence to global best practices, provide a fair and decent livelihood for all working-class people, and reduce any social or industrial tensions. • Ensure OSH code 2020 defines working hours, rights of employees, duties of employers, leave policies, directions on working conditions and arrangement of welfare activities. • Ensure ILO guidelines governs principle that workers must be protected from sickness, disease and injury arising from their employment & The Environment (Protection) Act was enacted in 1986 that provides for the protection and improvement of the environment. • Ensure Oil Industry Safety Directorate (OSID) Guidelines focuses on External Safety Audits, Offshore Safety Regulatory Activities,

<ul style="list-style-type: none"> • Apply regulatory obligations pertaining to Petroleum & Explosive Safety Organization (PESO)-Explosive Act 1884. • Apply regulatory obligations pertaining to Gas Cylinders Rule 2016. • Apply regulatory obligations pertaining to The Boilers Act 1923. • Apply regulatory obligations pertaining to Workmen Compensation Act 1923 & Employee State Insurance Act 1948 and related compliance. • Apply regulatory obligations pertaining to Motor vehicle Act 1988. • Apply regulatory obligations pertaining to First Aid at workplaces and training on first aid. 	<p>Conducting Training Programme / Workshop, and Accident Reporting & Investigation in oil fields.</p> <ul style="list-style-type: none"> • Comprehend the regulatory obligations pertaining to Mines Vocational Training Rules – DGMS. • Ensure Electricity Act 2010 & 2003 consolidate the laws relating to generation, transmission, distribution, trading, and use of electricity. • Ensure NBC 2016 contains administrative regulations, development control rules and general building requirements; fire safety requirements; stipulations regarding materials, structural design, and construction. • Implement fire, electrical, and life safety guidelines and requirements. • Implement regulations on regulate the manufacture, possession, use, sale, transport, and importation of Explosives. • Implement insurance policy designed to financially protect employees in the wake of any accidents & social security scheme aimed at providing the requisite medical and financial assistance to employees across the country. • Provide necessary temporary assistance an injured person needs until professional medical care can be provided.
Classroom Aids:	
Black/White Board, Computer, Projection Equipment, MS office & Design & drafting software, Facilitator's Guide, Participant's Handbook.	
Tools, Equipment and Other Requirements	
Regulations, Books, Handouts, Laptop/computer, internet.	

Module 6: Knowledge & understanding to take precautions & measures to ensure proper health, hygiene, working environment and psychological health of workers at workplace.

Mapped to SSD/N0110, v 1.0

Terminal Outcomes:

- Health hazards identification for workers at work places.
- Measures to ensure health, hygiene, & cleanliness at work site.
- Psychological health of workers & working environment.

Duration: 30 Hours	Duration: 20 Hours
Theory–Key Learning Outcomes	Practical–Key Learning Outcomes
<ul style="list-style-type: none"> • Introduction to the hazards and risks at the workplace for the health of workers & employees due to hygiene, sanitation and working environment. • The requirements of health, hygiene & sanitation at the workplace to mitigate any risk to health of workers & employees at the work site. • Measures to be ensured for good health, hygiene of employees/ workers at the workplace. • Introduction to safe water hygiene, food hygiene and personal hygiene arrangements. • Introduction to housing hygiene, work hygiene, cleanliness, and ventilations at workplace. • Medical facilities at the workplace and its importance. • Overview of adequate policy, briefing & clarity on safety provisions at workplace. • Requirement of education facilities for children of workers and entertainment & communication facilities for all. 	<ul style="list-style-type: none"> • Identify health hazards for workers at work sites. • Identify measures and plan to ensure health, hygiene, & cleanliness at work site. • Identify & prepare plan to ensure psychological health of workers & working environment
Classroom Aids:	
Black/White Board, Computer, Projection Equipment, MS office & Design & drafting software, Facilitator's Guide, Participant's Handbook.	
Tools, Equipment and Other Requirements	

Safety goggles, Full face shield, Leather gloves, Puncture resistant gloves, Chemical resistant gloves, Electrically insulated latex gloves, Safety helmets/hard hats, Ear plugs, Ear muffs, Safety shoes, Safety gumboots, High visibility jackets, N95 masks, Double filter half face mask, Double filter full face mask, SCBA – Self-contained breathing apparatus, Safety harness, Lanyard, Fall arrestor, CO2 Fire extinguisher, Dry Chemical Powder Fire extinguisher, Fire hydrant system, Multiple gas detector, TDS Meter.

Module 7: Planning and organizing to provide a safe working environment for workers and set emergency protocols and measure in case of any unforeseen and incidents or accidents to minimize the damages & losses.

Mapped to SSD/N0104, v 1.0

Terminal Outcomes:

- Planning of resources for own work and communication to concerned subordinates, co-workers, and superiors.
- Provide necessary support to subordinates, coordinate with co-workers and liaise with superiors and monitor.
- Setting up emergency protocols and implementing them at working places to minimize the loss in case of any incident or accident.

Duration: 30 Hours	Duration: 20 Hours
Theory–Key Learning Outcomes	Practical–Key Learning Outcomes
<ul style="list-style-type: none"> • Introduction to planning of resources for own work and communication to concerned subordinates, co-workers, and superiors. • Introduction to hierarchy of organization and modes of communication to team members. • Introduction to identifying the task and distribution among subordinates, supervision, and coordination among the team members for readiness in sync with overall task & timelines. • Introduction to supervision and monitoring of a task to ensure timely completion of such work. • Setting up emergency protocols and implementing them at working places to minimize the loss in case of any incident or accident. • Setting up evacuation plans, evacuation drills, assembly area emergency communication & guidance. 	<ul style="list-style-type: none"> • Planning of resources and communication to concerned subordinates, co-workers, and superiors. • Prepare necessary support to subordinates, coordinate with co-workers and liaison with superiors and monitoring. • Set up emergency protocols and implement them at working places to minimize loss in case of any incident or accident.

Classroom Aids:
Black/White Board, Computer, Projection Equipment, MS office & Design & drafting software, Facilitator's Guide, Participant's Handbook.
Tools, Equipment and Other Requirements
Safety goggles, Full face shield, Leather gloves, Puncture resistant gloves, Chemical resistant gloves, Electrically insulated latex gloves, Safety helmets/hard hats, Ear plugs, Ear muffs, Safety shoes, Safety gumboots, High visibility jackets, N95 masks, Double filter half face mask, Double filter full face mask, SCBA – Self-contained breathing apparatus, Safety harness, Lanyard, Fall arrestor, CO2 Fire extinguisher, Dry Chemical Powder Fire extinguisher, Fire hydrant system, Multiple gas detector, TDS Meter.

Module 8: Understand scope in employment, financial dealing, digital literacy and communication with employer or customer.

Mapped to DGT/VSQ/N0102

Terminal Outcomes:

- Describe the traits of individual at workplace.
- Demonstrate apply employability and entrepreneurship skills at workplace.

Duration: 30:00	Duration: 30:00
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
<ul style="list-style-type: none"> • Discuss the importance of Employability Skills in meeting the job requirements. • Explain constitutional values, civic rights, duties, citizenship, responsibility towards society etc. that are required to be followed to become a responsible citizen. • Discuss 21st century skills. • Display positive attitude, self -motivation, problem solving, time management skills and continuous learning mindset in different situations. • Discuss the significance of reporting sexual harassment issues in time. • Discuss the significance of using financial products and services safely and securely. • Explain the significance of approaching the concerned authorities in time for any 	<ul style="list-style-type: none"> • Show how to practice different environmentally sustainable practices. • Use appropriate basic English sentences/phrases while speaking. • Demonstrate how to communicate in a well -mannered way with others. • Demonstrate working with others in a team. • Show how to conduct oneself appropriately with all genders and PwD. • Show how to operate digital devices and use the associated applications and features, safely and securely. • Create a biodata. • Use various sources to search and apply for jobs.

<p>exploitation as per legal rights and laws.</p> <ul style="list-style-type: none"> • Explain the importance of managing expenses, income, and savings. • Discuss the significance of using internet for browsing, accessing social media platforms, safely and securely. • Discuss the need for identifying opportunities for potential business, sources for arranging money and potential legal and financial challenges. • Differentiate between types of customers. • Explain the significance of identifying customer needs and addressing them. • Discuss the significance of maintaining hygiene and dressing appropriately. • Discuss the significance of dressing up neatly and maintaining hygiene for an interview. • Discuss how to search and register for apprenticeship opportunities. 	
Classroom Aids:	
<ul style="list-style-type: none"> • Black/White Board, Computer, Projection Equipment, PowerPoint Presentation and software, Facilitator's Guide, Participant's Handbook. 	
Tools, Equipment and Other Requirements	
<ul style="list-style-type: none"> • Laptop/computer, internet, mobile. 	

On The Job Training Plan: Safety Supervisor (OSHE)

Introduction to Occupational Safety, Health, and Environment (OSHE): 30 Hours
Key Learning Outcomes
<ul style="list-style-type: none"> • Work out safety requirements. • Prepare Safety Policy. • Prepare Safety goals and objectives. • Developing a positive safety culture for risk management. • Prepare incident reporting. • Conduct safety training.
Fire Safety, fire-fighting equipment, and fire evacuation plan : 20 Hours
Key Learning Outcomes
<ul style="list-style-type: none"> • Identify fire hazards at the workplace. • Distinguish between different classes of fire. • Evacuations, fire drills, use of PPEs. • Develop systematic approach in identifying and correcting probable fire accidents and suggest fire-fighting equipment. • Operate fire extinguisher and fire hydrant.
Hazard Identification, Categories and Control: 20 Hours
Key Learning Outcomes
<ul style="list-style-type: none"> • Identify hazards & categories the hazards • Implement “Hierarchy of control” in improvement methodologies. • Identify hidden risk in improved methodologies.
Health, Hygiene, Environment & Psychological Health : 10 hours
Key Learning Outcomes
<ul style="list-style-type: none"> • Identify health hazards for workers at work sites. • Identify measures and plan to ensure health, hygiene, & cleanliness at work site. • Identify & prepare plan to ensure psychological health of workers & working environment
Plan, Organize and Emergency protocols : 10 hours
Key Learning Outcomes
<ul style="list-style-type: none"> • Planning of resources and communication to concerned subordinates, co-workers, and superiors. • Prepare necessary support to subordinates, coordinate with co-workers and liaison with superiors and monitoring. • Set up emergency protocols and implement them at working places to minimize loss in case of any incident or accident.
Total Duration of OJT – 90 Hours (2.0 weeks)

ITI/12 th Pass	Any domain	10	Safety Domain	0	-	
Graduate in any discipline / Diploma in Engineering	Civil, Mechanical, Manufacturing, Mining, Production, Industrial, Chemical, Safety, Petroleum Engineering, Mathematics, Physics degree and others.	5	Safety Domain	0	-	
M. Tech/ B. Tech	Civil, Mechanical, Manufacturing, Mining, Production, Industrial, Chemical, Safety, Petroleum Engineering and others.	3	Safety Domain	0	-	

Assessor Certification	
Domain Certification	Platform Certification
Certified as assessor for the QP: "SSD/Q0102 v1.0 : Safety Supervisor (OSHE)" or higher qualification as per career progression. The minimum accepted score is 80%.	Recommended that the Assessor is certified for the Job Role: "Assessor (VET and Skills)", mapped to the Qualification Pack: "MEP/Q2701 v2.0". The minimum accepted score is 80%.

Assessment Strategy

The assessment will be based on the concept of third-party assessments through certified assessors with empanelled Assessment Agencies of NCVET. The certification of each assessor will be done by SSDF through a process of selection, training, assessment & certification through training of the assessor's program.

The assessments will include both formative & summative. The progressive assessments will be through a trainer during progress of the training. The summative assessments will be carried by the assessor through assessment agencies.

The assessment process will find whether the candidate or professional is competent or not to perform the job as per expected performance criteria. The assessment plan contains the following information:

- a) Assessment elements – Competencies based on performance criteria of each NOS.
- b) Methods of assessment – Written test (online/offline), viva and practical/ field exercises.
- c) Time of assessment – The assessment will be done both formative and summative (post orientation/training) of candidates.
- d) Place i.e., context of the assessment - The assessment will be conducted through theory, viva voice and practical/ field exercises, on simulators and will be both online or offline modes.
- e) The criteria for decision making– It will be based on assessment criteria & guidelines as given the qualification pack.
- f) Questions – The written questions, viva & practical questions will be set to cover all aspects of performance criteria and would have been validated from experts in the subject matter.
- g) Passing criteria & gradings – The passing criteria & gradings will be as per passing criteria given for each NOS and Guidelines for Assessment.

Glossary

Term	Description
Declarative Knowledge	Declarative knowledge refers to facts, concepts and principles that need to be known and/or understood to accomplish or to solve a problem.
Key Learning Outcome	Key learning outcome is the statement of what a learner needs to know, understand and be able to do to achieve the terminal outcomes. A set of key learning outcomes will make up the training outcomes. Training Outcome is specified in terms of knowledge, understanding(theory)and skills (practical application).
OJT(M)	On-the-job training (Mandatory); trainees are mandated to complete specified hours of training on site.
OJT(R)	On-the-job training (Recommended); trainees are recommended the specified hours of training on site.
Procedural Knowledge	Procedural knowledge addresses how to do something, or how to perform a task. It is the ability to work, or produce a tangible work output by applying cognitive, affective, or psychomotor skills.
Training Outcome	Training outcome is a statement of what a learner will know, understand and be able to do upon the completion of the training.
Terminal Outcome	Terminal outcome is a statement of what a learner will know, understand and be able to do upon the completion of a module. A set of terminal outcomes help to achieve the training outcome.
