

**Basics of Fire hazards & safety against fire hazards:**  
**SSD/M0103 Version: 1.0/NSQF Level: 4**

Job Role Name QP Code (Level)	<b>Basics of Fire hazards &amp; safety against fire hazards: SSD/M0103 Version: 1.0/NSQF Level: 4</b>	Batch Name/Id	
Duration	9:00 AM to 5:00 PM	Max Marks:	100
Name of Candidate		Aadhaar Number	
Candidate Fathers Name		Candidate Signature	
Assessor Signature		Trainer Signature	
TP Name		TC Name	
TP/TC Stamp with Signature		Date	

**Theory Part- 50 Marks**

Q1. Which of the following is NOT a circumstance that increases the likelihood of a fire in the workplace? **5 Marks**

- a) Properly stored flammable liquids in approved cabinets
- b) Overloaded electrical outlets
- c) Accumulation of paper and cardboard near a radiator
- d) Smoking in unauthorized areas

Q2. Which of the following is NOT a recommended control to prevent fire from flammable materials in the workplace? **5 Marks**

- a) Store flammable materials in approved, fire-resistant cabinets
- b) Train employees on emergency response procedures
- c) Prohibit smoking near flammable storage areas
- d) Keep containers of flammable materials open for easy access

Q3. When should gas detection equipment be considered in a risk assessment for flammable gas/vapors? **5 Marks**

- a) Only when a fire has already occurred
- b) Only for outdoor work areas
- c) Whenever there is a possibility of flammable gas/vapor accumulation, especially in confined or poorly ventilated spaces
- d) Only for routine office environments

Q4. Which of the following is NOT a recommended practice for the safe storage and handling of flammable materials in the workplace? **5 Marks**

- a) Store flammable chemicals in clearly marked, fire-resistant cabinets
- b) Keep gas cylinders in well-ventilated, marked areas and secure them upright
- c) Store combustible waste in labeled, fire-resistant containers
- d) Store all flammable materials together in one unlocked cabinet for easy access

Q5. Which of the following is NOT typically considered a common fire hazard in the workplace? **5 Marks**

- a) Overloaded electrical systems
- b) Properly stored office supplies in designated cabinets
- c) Smoking in unauthorized areas
- d) Faulty cooking appliances

Q6. Which of the following is NOT a recommended practice for ensuring fire protection equipment is effective in the workplace? **5 Marks**

- a) Store fire protection equipment behind locked doors for security
- b) Use clear signage to mark the location of fire extinguishers and alarms
- c) Provide regular training to all workers on how to use fire protection devices
- d) Keep equipment and exits free from obstruction

Q7. Which of the following is NOT a recommended practice for discarding hazardous waste? **5 Marks**

- a) Use labeled, leak-proof containers
- b) Dispose of hazardous waste in designated, secure areas

- c) Mix different types of hazardous waste in the same container
- d) Arrange for regular collection by licensed waste management services

Q8. Which of the following is NOT a recommended practice for storing flammable substances?

5 Marks

**Options:**

- a) Store in a dry, well-ventilated area
- b) Keep away from heat sources and ignition points
- c) Store large quantities in open, non-ventilated spaces
- d) Use approved, fire-resistant storage cabinets

Q9. Why is it important to schedule regular maintenance services for fire protection equipment?

5 Marks

**Options:**

- a) To ensure the equipment is always up to code and ready for use in case of a fire
- b) To decorate the workplace with fire safety posters
- c) To reduce the number of fire drills required
- d) To increase the number of fire extinguishers in the building

Q10. Which of the following is NOT a recommended step in planning emergency and evacuation plans to prevent further damage or issues in case of fire? 5 Marks

**Options:**

- a) Designate clearly marked primary and secondary escape routes
- b) Assign fire wardens and first aiders to manage evacuations
- c) Store flammable materials near emergency exits for quick removal
- d) Train all employees on evacuation procedures and conduct regular drills
