Qualification Structure

To achieve full certification as Safety Auditor, trainees must complete all seven units (NOS) and pass assessments. The assessments will comprise of theory & practical tests.

Sl. no	Unit No. (NOS)	Title	Assessment method
001	SSD/VSQ/N0113	Concept of Safety Audit,	The assessment will be made for the
		Need, Scope and	competencies required by the trainee on
		Methodologies of safety	skills, knowledge & understanding of safety
		audit	audit concepts, including its purpose, need,
			scope, types, and methodologies. The
			assessment will be based on theory, viva-
			voice or practical.
002	SSD/VSQ/N0130	Hazard identification,	The assessment will be made for the
		categories, and control	competencies required by the trainee on
			skills, knowledge & understanding of hazard
			identification, classification, and control
			techniques in the workplace. The
			assessment will be based on theory, viva-
			voice or practical.
003	SSD/VSQ/N0114	Risk Score Evaluation of	The assessment will be made for the
		Hazards	competencies required by the trainee on
			skills, knowledge & understanding of
			evaluating workplace hazards using risk
			scoring methods. The assessment will be
			based on theory, viva- voice or practical.
004	SSD/VSQ/N0115	Safety Audit Report	The assessment will be made for the
		Preparation	competencies required by the trainee on
			skills, knowledge & understanding of
			preparing comprehensive and compliant
			safety audit reports. The assessment will be
			based on theory, viva- voice or practical.

005	SSD/VSQ/N0131	Statutes & Legislative	The assessment will be made for the
		requirements in Health &	competencies required by the trainee on
		Safety	skills, knowledge & understanding of
			regulations and regulatory compliance
			requirements as per the laws governed by
			the Government of India. The assessment
			will be based on theory, viva- voice or
			practical.
006	SSD/VSQ/N0116	Plan, Organize & Monitor	The assessment will be made for the
			competencies required by the trainee on
			skills, knowledge, and understanding of
			planning, organizing, and monitoring tasks
			effectively to achieve quality outcomes in a
			timely and efficient manner. The
			assessment will be based on theory, viva-
			voice, or practical.
009	DGT/VSQ/N0102	Employability Skills	The assessment will be made for the
			competencies required by the trainee on
			skills, knowledge & understanding required
			by the professionals to generic skill in getting
			employment, financial dealing, digital
			literacy and communication with employer
			or customer. The assessment will be based
			on theory, viva- voice or practical.

Guidance for assessors

This qualification provides the performance criteria, skills and knowledge required to perform for the job role of Safety Auditor at NSQF Level 5. The role is referred to as 'Safety Auditor.'

Brief job description: Safety Auditor is responsible for scrutiny of an organization safety process to identify gaps, loopholes, and inefficiencies in safety processes. The job holder prioritizes safety issues that can cause harm to a person health and safety suggests measures to control them. He/she is also responsible to identify gaps in compliance of safety regulations and suggest methodologies to improve the safety compliance and processes.

Personal attributes: He/she should be mentally and professionally fit to take responsibility to ensure compliance of health and safety standards at the workplace with his/her integrity, objectivity, independence, knowledge of law, expression, and code of ethics.

Introduction to assessments:

The assessment will be made based on the competencies required by the trainees to perform the job role of Safety Auditor. The assessment will be based on understanding, practical demonstration and on the job training as defined in the performance criteria & practical skill defined in the qualification pack of the job role. The trainees will be required to complete a number of assignments to show their skills & understanding of the subject through theory, demonstration and practical performances.

Grading and pass percentage

- 1. The assessment consists of two categories:
 - a. Practical Assessment to assess the practical performance skills.
 - b. Theory Assessment to assess knowledge & understanding of the domain.
- 2. The weightage of the assessment will be:
 - a. Practical Assessment 50%
 - b. Theory Assessment 50%
- 3. Each NOS for its Performance Criteria (PC) has been assigned marks proportional to its importance.

 Proportion of marks for Theory and Practical has been marked NOS wise.
- 4. Questions on practical & theory will be formed in such a way as to provide outcome on maximum Performance Criteria and in proportional way within the NOS.

- 5. The assessment for the theory part will be based on written questions (short question, multiple choice & viva, or a combination of them) created/approved by the SSDF.
- 6. The assessment for the practical part will be based on practical conducted for trainees. In case of remote/on-line assessments, the practical's can be carried through proctors or practical questions formulated based on pictorially represented logical questions (based on pictures of practical & logical steps) created/approved by the SSDF.
- 7. The passing and grading criteria of each NOS & cumulative for QP will be as follows:
 - a. 70% or more than 70% Grade "A"
 - b. 60% or more than 60% but less than 70% Grade "B"
 - c. 50% or more than 50% but less than 60% Grade "C"
 - d. Less than 50% Grade "Fail."
 - e. If individual gets less than 50% and 35% or more in the NOS and overall, 50% or more; individual will be considered "pass" with grade "C" only irrespective of overall marks.
 - f. Individuals getting less than 50% in more than one NOS and getting overall marks 50% or more in QP will be put in grade "Fail".
 - g. Any candidate can ask for re-assessment in any of the NOSs or all the NOSs to improve his/her performance within three months from the date of publication of the results and after payment of the assessment fee. But if any candidate wants re-assessment after three months from the date of publication of results, he/she will have to appear in all the NOSs applicable for the qualification.

2.1 Performance/Skill Assessments

The performance/skill assessment will be conducted through demonstration/practical.

SSD/VSQ/N0113: Concept of Safety Audit, Need, Scope and Methodologies of Safety Audit – Performance/Skill Assessment

Trainees should demonstrate knowledge of audit planning, notification procedures, opening meetings, and the four stages of the audit process, including fieldwork, management response collection, report drafting, and conducting a closing meeting. Practical skills should include identifying internal and external audit scopes, differentiating between first, second-and third-party audits, and recognizing the purpose of compliance, program, and management system audits.

SSD/VSQ/N0130: Hazard identification, categories, and control-Performance/Skill Assessment

The trainee should demonstrate a fundamental understanding of key safety terms such as hazards, unsafe acts, incidents, accidents, near misses, and injury classifications. They must identify hazard categories and explain risks related to PPE, and recognize various safety signs and signals. The trainee should understand and apply the hierarchy of controls, explain each level's importance, and describe the steps involved.

SSD/VSQ/ N0114: Risk Score Evaluation of Hazards-Performance/Skill Assessment

The trainee should demonstrate a fundamental understanding of risk concepts, the objectives of risk assessment, the use of the 5x5 risk matrix, and how to interpret risk ratings. They must explain HIRA (Hazard Identification and Risk Assessment), including its legal requirements, and assess hazards based on likelihood and severity. The trainee should identify individuals exposed to hazards, analyze how hazards may lead to incidents, and perform a complete risk assessment using a risk matrix. They must recommend corrective actions based on the hierarchy of controls.

SSD/VSQ/N0115: -Safety Audit Report Preparation-Performance/Skill Assessment

The trainee should demonstrate knowledge of the difference between a health and safety inspection and a safety audit, along with the scope and relevance of a safety audit within a safety management system. They should identify and explain key elements of an audit report such as title, addressee, scope, reference documents, responsibilities, and final opinion as per standard formats.

SSD/VSQ/N0131: Statutes and Legislative requirements in Health and Safety-Performance/Skill Assessment

The trainee should demonstrate the ability to apply legal and regulatory obligations related to health, safety, and environmental compliance across a wide range of statutes and codes. They must show understanding and practical application of the BOCW Act, 1996; Factories Act, 1948; and OSH Code, 2020 along with OSHA compliance. The trainee should apply provisions from the Environment Protection Act, 1986, and align safety practices with ILO guidelines.

SSD/VSQ/N0116: Plan, Organize & Monitor-Performance/Skill Assessment

The trainee should demonstrate the ability to plan resources, schedules, and timelines in alignment with instructions received from superiors. They should understand the organizational hierarchy and communicate effectively with coworkers and supervisors. For organizing work, the candidate should show competency in collecting and provisioning necessary resources, communicating with relevant personnel, and briefing subordinates on the sequence, timing, and allocation of tasks and materials.

DGT/VSQ/N0102: Employability Skills

The trainee should demonstrate key employability skills such as communication, teamwork, digital literacy, and professionalism. They must be able to use internet, e-mails, financial transactions methods and Apps. They should be able to communicate and apply for the jobs online.

The Performance/Skill Assessments

The assessment will be conducted in a simulated working environment. Due to this fact, the assessors must note that the naturally occurring evidence of competence is unavailable or infrequent. Simulation must be undertaken in a Realistic Working Environment which provides an environment that replicates the key characteristics of the workplace in which the skill to be assessed is normally employed.

Scheduling the practical observations is flexible but to retain integrity of the assessment, they should be conducted as closely as possible to the written assessments.

Trainees are not permitted to use the observation checklist to work when completing the practical tasks but may familiarize themselves with it prior to an assessment.

It will be beneficial to take trainees through what is required in the practical assessments and the way in which each part will be graded. Trainees should have an opportunity to familiarize themselves with the way the tasks are graded.

Trainees may refer to their faculty for guidance on parts of the practical assignments only, though they should be aware that, especially for the practical assessments, the amount of guidance and support they are given may be reflected in the feedback and performance.

Knowledge Assessment

Synoptic test is an MCQ (Multiple Choice Question) test to assess the underpinning knowledge. The synoptic MCQ tests are externally set and externally marked.

This test is to be taken by the trainee after completion of all the units under controlled and invigilated conditions as closed-book test under the supervision of an assessor. Trainees can only achieve whole marks; half marks for partially answered questions are not permitted. Selection of two or more options will be marked as wrong.

The answers should be marked by pen only. The test may be conducted by the assessor in the oral mode, if required, considering the lack of reading and comprehending acumen (skills) of trainees. In such cases, the assessor will mention it on top of the MCQ submitted.

Grading criteria for The Performance/Skill Assessments

NOS No.	Title	Performance	Assessment	Min.	Assessment																
		& Knowledge	Marks	Passing	Result																
		Assessment		marks	(Total																
	Concept of Safety Audit, Need, Scope and Methodologies of safety audit.	60	100	50% of individual NOS and 50% overall as per NOS weightage	individual NOS and 50% overall as per NOS																
	Hazard identification, categories, and control	60	100			individual NOS and 50% overall as per NOS	individual	individual	individual	individual	individual	individual	individual	individual	individual	individual	individual	50% of total NOS weightage ≥			
SSD/VSQ/N0114	Risk Score Evaluation of Hazards.	39	100				Pass 50% of total														
SSD/VSQ/N0115	Safety Audit Report Preparation	49	100				NOS weightage <														
	Statutes and Legislative requirements in Health and Safety.	81	100				weightage	weightage	weightage	weightage	weightage	weightage	weigntage	weigntage	weightage	weigntage	weigntage	weigntage	weightage	weigntage	Fail
SSD/VSQ/N0116	Plan, Organize & Monitor.	30	100																		
DGT/VSQ/N0102	Employability Skills	41	50																		
	Total	360 Min	650 Marks																		

2.2 Viva Assessment

Trainees may be required to take the viva test for their theory or their practical observation test which is an extended part of the practical observation and assessment. The viva assessments are externally set and externally marked.

2.3 Question papers for synoptic test

The question paper of the synoptic test is a confidential document. It will be held under the custody of SSDF/Assessment Agencies. The assessment agencies can be permitted to prepare the question papers and get them approved from SSDF. The centers need to follow the indenting process to obtain the question paper to administer the test.

2.4 Authenticity

Centers are reminded to check for authenticity of work where trainees may be using texts and the internet to complete tasks.

2.5 Feedback

Assessors must provide feedback on every occasion when a skills observation takes place. A proforma for feedback is included in this assessment guide.

2.6 Trainee records of coursework

Trainees should be encouraged to keep their work carefully in a portfolio or scrapbook. This may be an unfamiliar form of record keeping for some, but it is a good discipline which will benefit them when they progress in their learning and training.

2.7 Assessment sheets

The assessment records will be maintained as per the assessment sheet given in this document.

2.8 Codes of practice

Safe working practices, health and safety and codes of practice associated with the industry must always be adhered to.

2.9 Health and safety

The requirement to follow safe working practices is an integral part of all assessments and it is the responsibility of centers to ensure that all relevant health and safety requirements are in place before trainees start practical assessments.

Should a trainee fail to follow health and safety practice and procedures during an assessment, the assessment must be stopped and the trainee be advised of the reasons. In case of doubts, guidance should be sought from the SSDF.

2.10 Verification of assignments

By using marking checklists, verifiers can check that evidence for an assignment is complete and can ensure that allocation of marks has been fair and beyond dispute.

2.11 Internal quality assurance

Approved centers must have effective quality assurance systems to ensure optimum delivery and assessment of qualifications.

Quality assurance includes initial center approval, qualification approval and the Centre's own internal procedures for monitoring quality. Centers are responsible for internal quality assurance and SSDF and Assessment Agency are jointly responsible for external quality assurance.

Full details and guidance on the internal and external quality assurance requirements and procedures are provided by SSDF from time to time.

The Assessment Agencies are required to retain copies of trainees' assessment records and photographic evidence (in presence of trainee performing task) for three years after assessment. They can be asked by SSDF to provide these evidences as proof of assessment.

2.12 Evidence Collection by the Assessor

- The assessor needs to collect a copy of the attendance for the training done. The attendance sheet needs to be signed by the Training Centre Head.
- The Centre head also needs to declare that all the students appearing in the assessments have a minimum attendance of 70% for the training.
- The assessor needs to verify the authenticity of the candidate by checking the photo ID card issued by the institute as well as any one Photo ID card issued by the Central/ State Government.

- The same needs to be mentioned in the attendance sheet. Wherever required, the assessor can authenticate and cross verify trainee's credentials in the enrollment form.
- The assessor needs to punch the trainee's roll number on all the final job pieces of learners.
 Different sections can have alpha numbering such as if a student's roll number is 123 then the three pieces submitted by that student can be numbered as 123a, 123b and 123c.
- The assessor needs to take a group photograph of all the students along with the assessor standing in the middle and with the Centre name/banner at the back, as evidence.
- The assessor needs to carry a camera to click photographs of the trainees working on the job and give theory exam as evidence with geo tagged, timestamp.
- The assessor also needs to carry a photo ID card.
- In the Assessment Evidence Form (provided after the practical marks sheet), the assessor should place the final photographic evidence in the space provided as evidence, from appropriate angles/sides of the final job piece submitted.

Trainee Guidance

Information for trainees

The assessment requires a trainee to perform a combination of tasks as given below:

The trainee will be required to demonstrate the occupational skills, knowledge, understanding and competencies mentioned in the Qualification Pack.

Before the final assessments

The training partner (TP) will ensure that the trainees are ready for the assessment. The date and time of assessment would be intimated by the SSDF.

The trainee is required to reach the assessment venue at the scheduled date and time. TP is required to circulate/download the information regarding the assessment to the trainee. Failure to reach the assessment venue for the theory or the practical test as per the schedule would be considered absent. In exceptional cases, an assessor can give a maximum of half an hour of concession time for late coming.

The trainee is required to carry their Institutes photo ID card as well as a government issued photo ID card for verification on all days of assessments.

Any misbehavior/unethical practice by a trainee would lead to disqualification of the trainee.

The first assessment will have the theory test followed by practical and may be viva in smaller batches. (20- 30 trainees)

Assessments

Assessments for the job role of Safety Auditor are conducted to gauge and assess the trainees' competencies and professional expertise as well as their skill and knowledge in the specified job role for Safety Auditor.

During the practical task, trainees will be assessed on their workmanship, quality of finished products, time management, etc., based on the performance criteria (PC), knowledge and understanding and their professional and soft skills as specified in the qualification pack. They will be graded for all their assessments based on the approved assessment strategy of the Qualification Pack. The performance criteria checklist as a guide for all qualifications is given in Practical Observation Checklist. Assessment tools and sample set of practical, theory & viva questions for each NOS, assessment evidence, overall summary, and NOS wise summary are also listed.

Asses	ssment	Method/Tools		
SSD/V	SQ/N011	3: Concept of Safety Audit, Need,	Scope a	and Methodologies of safety audit.
A. Prac	tical Qu	estions		Total Marks:40
Prepare	e an Audit	t Plan for a Safety Audit for a constru	iction si	te?
B. Mult	iple Cho	ice Questions (12*5=60 marks)		
01	What is	a common outcome of a safety auc	lit?	
		A. Increased employee turnover		B. Enhanced customer loyalty
		C. Identification of safety hazards		D. None of the above
02	What is	the focus of the analysis technique	in audit	es?
		A. Conducting physical inspections of assets		B. Gathering qualitative data from employees
		C. Comparing SAFETY data against benchmarks or expectations		D. Creating visual aids for presentations
03	Which	of the following is a key outcome of t	the oper	ning meeting?
		A. Assignment of audit tasks		B. Finalization of the audit report
		C. Identification of training needs		D. Establishment of communication channels
04	What d	oes the audit fieldwork stage focus (on?	
		A. Notifying employees about the audit		B. Presenting findings to management
		C. Gathering information through observations and interviews		D. Following up on previous audits
05	What is	a common method for tracking follo	ow-up a	ctions post-audit?
		A. Using spreadsheets or management software		B. Waiting for employees to report issues

		C. Keeping verbal records		D. Relying on memory			
06	What is	one reason organizations might opt	t for inte	rnal audits over external audits?			
		A. Requirement for third-party verification		B. Lower cost and greater control			
		C. More stringent standards		D. More comprehensive coverage			
07	The scope of a machinery audit generally includes						
		A. Employee performance metrics		B. Financial implications			
		C. Safety, maintenance, and operational efficiency		D. All of the above			
08	What is	a benefit of implementing a PDCA o	cycle in	safety management?			
		A. It guarantees the elimination of all workplace hazards		B. It helps in the continuous improvement of safety processes			
		C. It replaces the need for regular safety training		D. It reduces the need for safety audits and inspections			
09	What does the safety management system primarily aim to achieve?						
		A. Improved employee morale		B. Improved safety performance and culture			
		C. Enhanced organizational efficiency		D. Decreased workforce			
10	In the "Do" stage, how can organizations ensure effective communication of safety protocols?						
		A. Through email		B. By using social media			
		C. By holding regular safety meetings		D. None of the above			
11	In a safety audit, findings during the "Check" phase should lead to what action in the "Act" phase?						
		A. Ignoring minor issues		B. Establishing corrective measures			
		C. Reassessing the objectives		D. Focusing only on training			

12	What is the outcome if an auditor identifies instances of "window dressing"?					
		A. The auditor should ignore these findings		B. The audit is considered successful		
		C. The auditor must report these findings and recommend corrective actions		D. No action is needed		
SSD/VS	SQ/N013	0: Hazard Identification, Categorie	es, and	control		
A. Pra	ctical Qı	uestions		Total Marks:40		
Identif	y the haz	ard & evaluate the risk involved in w	ork at H	eight activity-Any 2 Primary hazards		
B. Mul	tiple Ch	oice Questions (12*5=60 marks)				
13	Which	of the following best defines a hazar	d in the	context of workplace safety?		
		A. An unsafe act committed by an employee		B. A minor injury requiring first aid treatment		
		C. A near miss incident		D. A potential source of harm or danger		
14	Which	of the following describes an incider	nt?			
		A. A planned event		B. A scheduled maintenance event		
		C. Any unplanned event that causes injury or damage		D. All of the above		
15	In hierarchy of controls, PPE (Personal Protective Equipment) is					
		A. First Line of defense		B. Last Line of defense		
		C. Both A & B		D. None of the above		
16	Which	control is focused on creating a safe	r work e	environment through design?		
		A. Elimination		B. Administrative controls		
		C. PPE		D. Engineering controls		

17	How can administrative controls improve workplace safety?									
		A. By requiring personal protective equipment		B. By installing physical barrier						
		C. By changing how people work and enforcing safe practices		D. By replacing hazardous materials						
18	Which o	of following is electric hazard?								
		A. Electric Shock		B. Burns						
		C. Arcing		D. All of the above						
19	Which of the following is a safety precaution for using ladders?									
		A. Using a ladder with missing rungs		B. Placing the ladder on unstable surfaces						
		C. Overreaching while on the ladder		D. Maintaining three points of contact						
20	What is a key factor in preventing workplace violence?									
		A. Ignoring employee concerns		B. Isolating employees						
		C. Promoting a positive work environment		D. Enforcing strict policies without communication						
21	What do	oes an MSDS provide information ab	out?							
		A. The cost of a chemical		B. Handling, storage, and emergency measures						
		C. The marketing strategy for a product		D. All of the above						
22	What is	the primary goal of Hazard Identific	ation ar	nd Risk Assessment (HIRA)?						
		A. To eliminate all hazards in the workplace		B. To assign blame for workplace accidents						
		C. To identify potential risks and implement measures to mitigate them		D. To increase productivity by ignoring safety concerns						

23	What is an example of an ergonomic hazard?									
		A. Chemical exposure		B. Excessive noise in the work						
		C. Inadequate lighting			Poor workstation design leading to repetitive strain injuries					
24	What is	a significant mental health risk in th	ne workį	olace	?					
		A. Effective communication		В	Job satisfaction					
		C. Physical activity		D. 3	Stress and burnout					
SSD/VS	SQ/N011	4: Risk Score evaluation of Hazar	rds							
A. Pra	ctical Qı	uestions			Total Marks:28					
What ar	e the haza	ards involved in the below picture?								

в. м	3. Multiple Choice Questions (7*6=42)								
25	Howis	s ris	k typically calculated in a risk asses	ssment	?				
		A.	Risk = Severity - Likelihood		В.	Risk = Severity / Likelihood			
	C. Risk = Likelihood + Severity		Risk = Likelihood + Severity		D.	Risk = Likelihood x Severity			
26	What	doe	s a risk matrix help organizations de	etermin	ie				
			The likelihood and impact of tential risks		B.	Risk prioritization			
		C.	Both A & B		D.	None of the above			
27			the following describes the co			oach for corrective action in Hazard the hierarchy of controls?			
		A.	Eliminate the hazard, substitute with a safer option, and use personal protective equipment as the last resort		B.	Immediately use personal protective equipment and provide training to employees			
		C.	Install safety signs, increase supervision, and change work procedures		D.	Rely solely on administrative controls and avoid engineering solutions			
28	What i	s a k	ey criterion when selecting a contracto	or?					
		A.	Past safety performance		В.	Cost of services			
		C.	Length of experience		D.	Proximity to site			
29	assoc	iate		idents		evaluating, and controlling hazards d ensure the safety of workers, the			
		A.	True		В.	False			
30	What i	s the	e primary purpose of issuing a work per	mit to c	onti	ractors?			
		A.	To define the specific scope of work and safety requirements for the job		В.	To monitor the contractor's performance after the job is completed			
		C.	To allow contractors to start work without any safety requirements		D.	None of the above			

31	What is the main role of a safety committee in an organization?											
		A. To write work permits for contractors		B. To ensure that safety policies and procedures are implemented and followed								
		C. To manage the company's financial budget for safety equipment		D. To conduct all safety inspections and enforce discipline								
SSD/\	SD/VSQ/N0115: Safety Audit Report Preparation											
A. Pr	A. Practical Questions Total Marks:32											
Prepare a check list and safety audit report for any activity with reference to IS 14489 (30 marks)												
B. M	ultiple	Choice Questions (6*6=36)										
32	Which	of the following best describes a safety ins	spection	?								
		A. A one-time assessment of an organization's safety program		B. A thorough review of all safety documents and policies								
		C. An evaluation of employee training programs		D. A systematic examination of specific areas or equipment for hazards								
33	Why is	management commitment crucial in a saf	ety poli	cy?								
		A. It is only necessary during audits		B. It complicates safety procedures								
		C. It sets the tone for the importance of safety in the organization		D. None of the above								
34	IS 1448	39:1998 promotes the concept of										
		A. Ignoring audit findings		B. Continuous monitoring and improvement								
		C. Limiting the scope of audits		D. All of the above								
35	Which	record type might show the outcomes of e	mploye	e health assessments?								
		A. Absence and sickness data		B. Compliance data								
		C. Maintenance records		D. Health surveillance records								
36	Which	of the following is essential for the credibil	lity of ar	audit report?								
		A. Auditor's personal beliefs		B. Length of the report								
		C. Transparency and objectivity		D. Complexity of language used								

37	What is the primary purpose of a Standard Operating Procedure (SOP) in an organization?									
		A.	To provide a step-by-step guide for performing tasks in a consistent and efficient manner			To create a list of employee duties and sponsibilities				
		C.	To track employee performance and productivity		D.	All of the above

38	By imp	olem	enting the Mines Vocational Training R	ules, th	e D0	GMS aims				
		A.	to promote a culture of safety		В.	to reduce the risk of accidents and injuries				
		C.	to enhance the overall efficiency		D.	All of the above				
39	Whati	s the	penalty for theft of electricity under th	ne Elect	ricit	y Act, 2003?				
		A.	A warning		В.	Suspension of power supply				
		C.	Fine and imprisonment		D.	No penalty				
40	key as	pect	s of the Gas Cylinder Rules of 2016 inc	clude:						
		A.	Licensing and Registration		B.	Labelling and Marking				
		C.	Safety Standards for gas cylinder		D.	All of the above				

41	What is the primary objective of the Explosives Act 1884 (PESO)?										
	A. To promote the use of fireworks in public celebrations.	B. To restrict the import of petroleum products.									
	C. To regulate the safety standards for the manufacture and storage of explosives.	D. To encourage the use of explosives in construction without restrictions									
42	Which of the following is a key element in NFPA's approach to fire safety?										
	A. Ignoring building occupancy	B. Emphasizing risk management and prevention									
	C. Reducing costs at the expense of safety	D. All of the above									
43	key provisions of the Motor Vehicle Act include										
	A. rules regarding vehicle registration and licensing	B. penalties for traffic violations									
	C. standards for vehicle safety and emissions	D. All of the above									
44	Under the BOCW Act, who is responsible for en	suring safety measures at construction sites?									
	A. The employer and the contractor	B. The workers' unions									
	C. Factory Inspector	D. All of the above									
45	Under the Factories Act, which of the following	s a duty of the occupier?									
	A. Maintaining safety measures	B. Providing recreational facilities									
	C. Ensuring health and welfare of workers	D. All of the above									
46	What is the primary objective of the Oil Industry	Safety Directorate (OSID) Guidelines?									
	A. To regulate environmental emissions for oil and gas companies	B. To promote oil industry profitability									
	C. To establish guidelines for employee training programs	D. To ensure the safety and health of workers in the oil and gas industry									
47	Which of the following is the primary purpose of	ILO Conventions?									
	A. To provide voluntary guidelines for workplace behavior	B. To set international standards for labor rights and conditions									

	C. Both	A & B		D.	None of the above						
SSD/	/SQ/N0116: Plar	, Organize and Monitor.									
A. Pra	ectical Question	S			Total Marks:40						
Wha	What are the emergency scenarios could happen in a construction site										
B. M	ultiple Choice Q	uestions (12*5=60)									
48	What is the primary goal of integrating safety measures into project schedules?										
	A. To re	educe project duration			To ensure safety is prioritized and naged effectively						
	C. To ir	crease project risks		D.	To ignore safety protocols						
49	Which of the fol	owing is a common barrier to effe	ective c	omn	nunication?						
	A. Feed	lback loops		В.	Active listening						
	C. Lang	guage barriers		D.	Clear and concise messaging						
50	What does "reso	ource levelling" aim to achieve in p	project	sche	eduling?						
	A. Opti	mizing resource usage		В.	Increasing project costs						
	C. Dela	ying project completion		D.	Reducing project scope						
51	How does resou	rce allocation differ from resourc	e provi	sioni	ing in project management?						
	resc	cation focuses on identifying urce needs, while provisioning ses on distributing resources.			They are the same and can be used erchangeably.						
	resc	isioning focuses on identifying urce needs, while allocation ses on distributing resources.		D.	They both focus on identifying resource needs and distributing resources						
52	Which of follow	ng is techniques for avoid resourc	ce overl	oadi	ing?						
	A. Res	ource Levelling		В.	Linking Tasks						
	C. Prio	ritize Projects		D.	All of the above						

53	What is the primary goal of briefing co-workers a	nd subordinates?
	A. To increase task complexity	B. To ensure they understand their roles and responsibilities
	C. To minimize task completion	D. To avoid task execution
54	What is the role of a project manager in guiding s	subordinates?
	A. To do all the work themselves	B. To micromanage every task
	C. To limit team autonomy	D. To provide direction, support, and resources needed for success
55	When should documentation be created during	a project?
	A. Only at the end of the project	B. Throughout the entire project lifecycle
	C. Only when issues arise	D. None of the above
56	Which of the following is an indicator of success	ful resource provisioning?
	A. Budget overruns	B. Lack of coordination
	C. Timely project completion	D. Increased complaints
57	Monitoring of work involves regularly checking a and adherence to procedures to ensure that wo	nd assessing employee performance, safety practices, k is being done correctly and safely.
	A. True	B. False
58	What is the best practice for presenting data in r	eports?
	A. Use complex graphs and charts	B. Overload the report with unnecessary information
	C. Use clear visuals and straightforward explanations	D. Avoid using visuals

59	In the context of compliance, what does proper d	ocumen	itatio	on help an organization achieve?
	A. It ensures transparency and accountal for audits and inspection	oility		B. It allows for the secret tracking of employee activities
	C. It replaces the need for employee tra	ining		D. All of the above
