

SSDF Strengthens Commitment to Advancing EHS Standards at Siemens Business Partner EHS Engagement Workshop 2025

The Safety Skill Development Foundation (SSDF) proudly participated in the *Siemens Business Partner EHS Engagement Workshop 2025*, a key platform dedicated to strengthening Occupational Safety, Health, and Environment (OSHE) practices across industries.

The workshop provided valuable opportunities to exchange ideas, share best practices, and reaffirm the collective responsibility of industry partners in advancing workplace safety and sustainability.

Speaking on the occasion, SSDF highlighted its continued commitment to Environmental, Health, and Safety (EHS) excellence. Through NSQF-compliant, industry-focused, and government-approved OSHE programs, SSDF is building a skilled workforce equipped to address emerging safety challenges and support long-term sustainable growth.

The event reinforced the importance of collaboration, knowledge-sharing, and continuous learning in nurturing a strong safety-first culture. SSDF looks forward to deepening partnerships and driving impactful initiatives that contribute to safer, healthier, and more sustainable workplaces.
