

## SSDF ADVANCES TOMT/TOMA CAPACITY BUILDING ON BOCW ACT COMPLIANCE

The Safety Skill Development Foundation (SSDF) has successfully advanced its capacity-building initiatives through specialised Training of Master Trainers (TOMT) and Training of Master Assessors (TOMA) on the *Basics of Safety & Health Requirements under the Building and Other Construction Workers (BOCW) Act, 1996*.

This focused programme is designed to strengthen compliance readiness across the construction ecosystem by equipping trainers and assessors with industry-aligned knowledge on statutory obligations, workforce safety standards, and on-site health practices.

### ◆ Program Highlights

- Comprehensive legal orientation on key compliances, welfare provisions, and mandates under the BOCW Act, 1996.
- Practical and scenario-driven sessions enabling participants to interpret and apply safety norms within real worksite conditions.
- Standardised exposure to safety tools, equipment, and PPE, enhancing uniformity in training and assessments across construction trades.
- Outcome-based session design aligned with national skilling standards, integrating structured objectives and measurable learning outputs.

### ◆ Why This Update Is Significant

The construction sector continues to witness an increasing demand for trained EHS professionals. Strengthening TOMT/TOMA capabilities directly supports India's national agenda of improving workplace safety, reducing incidents, and enhancing overall workforce wellbeing.

SSDF remains committed to enabling safer, compliant, and more resilient construction worksites through robust EHS skilling.

Day 2 - Training of Master Trainer/Master Assessor (ToMT/MA-014) - Basics of Safety & Health Require
