

SSDF Onboards Millennium Software Solutions as Training Partner

Safety Skill Development Foundation (SSDF) has onboarded Millennium Software Solutions, a software training institute with a presence in Visakhapatnam and Hyderabad, as its Training Partner.

The collaboration aims to strengthen access to industry-aligned safety, Environment, Health and Safety (EHS), and skill development programmes, while leveraging Millennium Software Solutions' training capabilities to support learners and professionals in developing relevant workplace competencies.

Under the partnership, SSDF and Millennium Software Solutions will collaborate to:

- Deliver industry-relevant EHS and safety training programmes
- Expand access to structured skill development initiatives
- Support competency-based learning and certification pathways
- Leverage technology-enabled learning approaches
- Contribute to the development of a skilled and safety-conscious workforce

The onboarding of Millennium Software Solutions further expands the SSDF Training Partner network and supports its efforts to promote competency-based safety and EHS skill development across diverse learner and professional groups.

SSDF welcomes Millennium Software Solutions to its Training Partner network and looks forward to a productive collaboration focused on workforce readiness, competency development and safer workplaces.
