

Programme Highlights & Key Outcomes *ToMT/ToMA for Basic & Advance Rigger*

Safety Skill Development Foundation (SSDF) conducted a Training of Master Trainer (ToMT) / Training of Master Assessor (ToMA) programme focused on the Basic Rigger - Level 3.0 and Advance Rigger - Level 4.0 qualifications from 15th to 18th September 2026. The 4-day programme was conducted online and was designed to strengthen the capabilities of trainers and assessors engaged in the domain of rigging and lifting operations.

The programme focused on developing a deeper understanding of safe rigging practices, operational planning, rigging techniques, equipment handling, hazard identification and risk mitigation. Participants were also oriented towards the inspection and maintenance of rigging equipment and the roles and responsibilities associated with Basic and Advance Rigger competencies.

Key Areas Covered

The programme covered the following areas:

- Safe rigging practices and planning
- Rigging techniques and equipment handling
- Hazard identification and risk mitigation
- Inspection and maintenance of rigging gear
- Roles and responsibilities of Basic and Advance Riggers
- Competency-based training and assessment practices

Through the ToMT/ToMA programme, SSDF aims to contribute to strengthening the trainer and assessor ecosystem for rigging occupations and support the development of a skilled and competent workforce equipped to undertake rigging and lifting operations safely and effectively.

The programme reflects SSDF's continued focus on competency development, occupational safety and industry-aligned skill development in critical industrial occupations.
